Class: Spring 2021 MTH 129 Precalculus I - Section 950 (20435)
Subject: College Algebra
Class Dates: 01/19/2021-05/14/2021
Textbook: Coburn/Coff elt: College Algebra, 3rd Ed. (McGraw-Hill)

Class Code: 664QA-QYVTY
Instructor: Kifowit
Class Content: 238 topics / 188 accessible topics

## Objectives

1. Week 1: Sections 1.1-1.2 (17 topics)
2. Week 2: Sections 1.2-1.3 (17 topics)
3. Week 3: Sections 1.4-1.5 (16 topics)
4. Week 4: Sections 1.5-1.6 (20 topics)
5. Week 5: Section 1.6 (12 topics)
6. Week 6: Section 2.1 (12 topics)
7. Week 7: Sections 2.2-2.3 (21 topics)
8. Week 8: Section 2.4 ( 20 topics)
9. Week 9: Section 2.5 (15 topics)
10. Week 10: Section 3.1 ( 12 topics)
11. Week11: Sect. 3.1, 3.2, 3 (19 topics)
12. Week 12: Section 3.5-3.6 ( 13 topics)
13. Week 13: Section 4.1 (9 topics)
14. Week 14: Sections 4.2-4.4 (19 topics)
15. Week 15: Sections 4.5-4.6 (21 topics)

Dates
01/19/2021 12:00 AM - 01/25/2021 11:59 PM
01/26/2021 12:00 AM - 02/01/2021 11:59 PM
02/02/2021 12:00 AM - 02/08/2021 11:59 PM
02/09/2021 12:00 AM - 02/15/2021 11:59 PM
02/16/2021 12:00 AM - 02/22/2021 11:59 PM
02/23/2021 12:00 AM - 03/01/2021 11:59 PM
03/02/2021 12:00 PM - 03/08/2021 11:59 PM
03/09/2021 12:00 AM - 03/22/2021 11:59 PM
03/23/2021 12:00 AM - 03/29/2021 11:59 PM
03/30/2021 12:00 AM - 04/05/2021 11:59 PM
04/06/2021 12:00 AM - 04/12/2021 11:59 PM
04/13/2021 12:00 AM - 04/19/2021 11:59 PM
04/20/2021 12:00 AM - 04/26/2021 11:59 PM
04/27/2021 12:00 AM - 05/03/2021 11:59 PM
05/04/2021 12:00 AM - 05/14/2021 11:59 PM
f) Accessible Topic - Topics accessible to visually impaired students using a screen reader.

Week 1: Sections 1.1-1.2 (17 Topics, due on 01/25/2021 11:59 PM)

## Section R. 1 (1 Topic)

- Writing an inequality for a real-world situation

## Section 1.1 (10 Topics)

- Solving a multi-step equation given in fractional form
- Solving a linear equation with several occurrences of the variable: Variables on both sides and distribution (ᄌ才)
- Solving a linear equation with several occurrences of the variable: Variables on both sides and two distributions
- Solving a linear equation with several occurrences of the variable: Fractional forms with monomial numerators
- Solving a two-step equation with signed fractions
- Solving a linear equation with several occurrences of the variable: Variables on both sides and fractional coefficients
- Solving a linear equation with several occurrences of the variable: Fractional forms with binomial numerators
- Solving equations with zero, one, or infinitely many solutions
- Translating a sentence into a multi-step equation
- Writing a multi-step equation for a real-world situation

## Section 1.2 (7 Topics*)

- Writing an inequality for a real-world situation
- Graphing a linear inequality on the number line
- Writing an inequality given a graph on the number line
- Graphing a compound inequality on the number line
- Writing a compound inequality given a graph on the number line
- Set-builder and interval notation
- Union and intersection of finite sets
(*) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

## Section 1.2 （7 Topics）

－Solving a two－step linear inequality：Problem type 2 万
－Solving a two－step linear inequality with a fractional coefficient
－Solving a linear inequality with multiple occurrences of the variable：Problem type 1 శ
－Solving a linear inequality with multiple occurrences of the variable：Problem type 2 ช
－Solving inequalities with no solution or all real numbers as solutions
－Solving a compound linear inequality：Graph solution，basic
－Solving a compound linear inequality：Interval notation

## Section 1.3 （10 Topics）

－Solving an absolute value equation：Problem type 1 ช
－Solving an absolute value equation：Problem type 2 图
－Solving an absolute value equation：Problem type 3 శી
－Solving an absolute value equation：Problem type 4
－Solving an absolute value equation of the form $|a x+b|=|c x+d|$
－Solving an absolute value inequality：Problem type 1 त
－Solving an absolute value inequality：Problem type 2 ชิ
－Solving an absolute value inequality：Problem type 3 శ
－Solving an absolute value inequality：Problem type 4 ช
－Solving an absolute value inequality：Problem type 5 ช

Week 3：Sections 1．4－1．5（16 Topics，due on 02／08／2021 11：59 PM）

Section 1.4 （6 Topics）
－Using $i$ to rewrite square roots of negative numbers
－Simplifying a product and quotient involving square roots of negative numbers
－Adding or subtracting complex numbers
－Multiplying complex numbers ชช
－Dividing complex numbers
－Simplifying a power of $i$ 团

## Section 1.5 （10 Topics）

－Solving an equation written in factored form
－Finding the roots of a quadratic equation of the form $a x^{2}+b x=0$
－Finding the roots of a quadratic equation with leading coefficient 1 శ
－Finding the roots of a quadratic equation with leading coefficient greater than 1
－Solving a quadratic equation needing simplification
－Roots of a product of polynomials
－Solving an equation of the form $\times 2=$ a using the square root property
－Solving a quadratic equation using the square root property：Exact answers，basic $\overparen{\jmath}$
－Solving a quadratic equation using the square root property：Exact answers，advanced
－Completing the square

Week 4：Sections 1．5－1．6（20 Topics，due on 02／15／2021 11：59 PM）

Section 1.5 （6 Topics）
－Applying the quadratic formula：Exact answers
－Applying the quadratic formula：Decimal answers
－Solving a quadratic equation with complex roots
－Discriminant of a quadratic equation
－Discriminant of a quadratic equation with parameter
－Solving a word problem using a quadratic equation with irrational roots

## Section 1.6 （15 Topics＊）

－Restriction on a variable in a denominator：Linear
－Solving a proportion of the form $a /(x+b)=c / x$（
－Solving a rational equation that simplifies to linear：Denominator $x+a$ ，
－Solving a rational equation that simplifies to linear：Denominators $a, x$ ，or ax
－Solving a rational equation that simplifies to linear：Denominators ax and bx
－Solving a rational equation that simplifies to linear：Like binomial denominators
－Solving a rational equation that simplifies to linear：Unlike binomial denominators
－Solving for a variable in terms of other variables in a rational equation：Problem type 2 ，
－Solving a word problem using a quadratic equation with irrational roots
－Solving an equation using the odd－root property：Problem type 2 ～
－Restriction on a variable in a denominator：Quadratic
－Solving a rational equation that simplifies to linear：Factorable quadratic denominator
－Solving a rational equation that simplifies to quadratic：Denominator $\times$ 团
－Solving a rational equation that simplifies to quadratic：Binomial denominators，constant numerators જr
－Solving a rational equation that simplifies to quadratic：Binomial denominators and numerators

## Section 4.1 （1 Topic＊）

－Solving a word problem using a quadratic equation with irrational roots
${ }^{\text {（＊）}}$ ）Some topics in this section are also covered in a previous section of this Objective．Topics are only counted once towards the total number of topics for this Objective．

Week 5：Section 1.6 （12 Topics，due on 02／22／2021 11：59 PM）

## Section 1.6 （12 Topics）

－Solving a radical equation that simplifies to a linear equation：One radical，advanced
－Solving a radical equation that simplifies to a linear equation：Two radicals
－Solving a radical equation that simplifies to a quadratic equation：One radical，basic
－Solving a radical equation that simplifies to a quadratic equation：One radical，advanced $\overparen{\sim}$
－Solving a radical equation with two radicals that simplifies to sqrt（x）＝a
－Solving an equation with a root index greater than 2：Problem type 1 శ
－Solving an equation with a root index greater than 2：Problem type 2 ；
－Solving an equation with exponent 1／a：Problem type 1 务
－Solving an equation with exponent 1／a：Problem type 2 ช
－Solving an equation with positive rational exponent
－Solving an equation that can be written in quadratic form：Problem type 1 శ
－Solving an equation that can be written in quadratic form：Problem type 2 万

Week 6：Section 2.1 （12 Topics，due on 03／01／2021 11：59 PM）

## Section 2.1 （12 Topics）

－Distance between two points in the plane：Exact answers
－Distance between two points in the plane：Decimal answers
－Midpoint of a line segment in the plane
－Finding a solution to a linear equation in two variables
－Graphing a parabola of the form $y=a x 2$
－Graphing a parabola of the form $y=a x^{2}+c$
－Graphing a cubic function of the form $y=a x 3$
－Identifying the center and radius to graph a circle given its equation in standard form
－Writing the equation of a circle centered at the origin given its radius or a point on the circle
－Writing an equation of a circle given its center and radius or diameter
－Writing an equation of a circle given its center and a point on the circle
－Writing an equation of a circle given the endpoints of a diameter

## Section 3.1 （1 Topic＊）

．Graphing a cubic function of the form $y=a x 3$

## Section 8.2 （2 Topics＊）

－Writing an equation of a circle given its center and a point on the circle
－Writing an equation of a circle given the endpoints of a diameter
${ }^{*}$ ）Some topics in this section are also covered in a previous section of this Objective．Topics are only counted once towards the total number of topics for this Objective．

## Section 2.2 (7 Topics)

- Graphing a line given its equation in standard form
- Graphing a vertical or horizontal line
- Graphing a line given its $x$ - and $y$-intercepts -
- Finding slope given two points on the line
- Writing the equations of vertical and horizontal lines through a given point
- Identifying parallel and perpendicular lines from coordinates
- Finding the initial amount and rate of change given a graph of a linear function

## Section 2.3 (14 Topics)

- Graphing a line through a given point with a given slope
- Finding the slope and $y$-intercept of a line given its equation in the form $A x+B y=C$ त
- Writing an equation in slope-intercept form given the slope and a point
- Finding the slope and a point on a line given its equation in point-slope form
- Graphing a line given its equation in point-slope form
- Writing an equation in point-slope form given the slope and a point
- Writing an equation of a line given the y-intercept and another point
- Writing the equation of the line through two given points
- Finding slopes of lines parallel and perpendicular to a line given in slope-intercept form
- Finding slopes of lines parallel and perpendicular to a line given in the form $A x+B y=C$ 团
- Writing equations of lines parallel and perpendicular to a given line through a point
- Interpreting the parameters of a linear function that models a real-world situation
- Choosing a graph to fit a narrative: Basic $\overparen{7}$
- Choosing a graph to fit a narrative: Advanced 3

Week 8: Section 2.4 (20 Topics, due on 03/22/2021 11:59 PM)

Section 2.4 (20 Topics)

- Vertical line test
- Evaluating functions: Linear and quadratic or cubic
- Evaluating a rational function: Problem type 1 శี
- Evaluating a rational function: Problem type 2 శᄌ兀
- Table for a square root function
- Evaluating a cube root function
- Evaluating functions: Absolute value, rational, radical
- Variable expressions as inputs of functions: Problem type 1 त
- Variable expressions as inputs of functions: Problem type 2 శ
- Variable expressions as inputs of functions: Problem type 3 3
- Domain of a rational function: Excluded values
- Domain of a rational function: Interval notation
- Domain of a square root function: Basic
- Domain of a square root function: Advanced $\overparen{\sim}$
- Finding the domain of a fractional function involving radicals
- Finding inputs and outputs of a two-step function that models a real-world situation: Function notation
- Finding an output of a function from its graph
- Finding inputs and outputs of a function from its graph
- Domain and range from the graph of a continuous function
- Interpreting the graphs of two functions

## Section 2.5 (1 Topic*)

- Domain and range from the graph of a continuous function

## Section 3.1 (1 Topic*)

- Domain and range from the graph of a continuous function

## Section 4.5 (2 Topics*)

- Domain of a rational function: Excluded values ภี
- Domain of a rational function: Interval notation (ᄌ)
(*) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

Week 9: Section 2.5 (15 Topics, due on 03/29/2021 11:59 PM)

## Section 2.4 (1 Topic)

- Domain and range from the graph of a continuous function

## Section 2.5 (15 Topics*)

- Finding intercepts of a nonlinear function given its graph
- Determining if graphs have symmetry with respect to the $x$-axis, $y$-axis, or origin
- Finding a difference quotient for a linear or quadratic function
- Finding a difference quotient for a rational function
- Domain and range from the graph of a continuous function
- Finding where a function is increasing, decreasing, or constant given the graph
- Finding where a function is increasing, decreasing, or constant given the graph: Interval notation
- Finding local maxima and minima of a function given the graph
- Finding values and intervals where the graph of a function is zero, positive, or negative
- Graphing a function of the form $f(x)=a x+b$ : Fractional slope
- Graphing a function of the form $f(x)=a x^{2}$
- Graphing a function of the form $f(x)=a x^{2}+c$
- Even and odd functions: Problem type 1
- Even and odd functions: Problem type 2 ス
- Finding the average rate of change of a function

## Section 3.1 (8 Topics*)

- Finding intercepts of a nonlinear function given its graph
- Domain and range from the graph of a continuous function
- Finding where a function is increasing, decreasing, or constant given the graph: Interval notation
- Finding local maxima and minima of a function given the graph $\overparen{\sim}$
- Finding values and intervals where the graph of a function is zero, positive, or negative
- Graphing a function of the form $f(x)=a x+b$ : Fractional slope
- Graphing a function of the form $f(x)=a x^{2}$
- Graphing a function of the form $f(x)=a x^{2}+c$
${ }^{*}$ ) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

Week 10: Section 3.1 (12 Topics, due on 04/05/2021 11:59 PM)

## Section 3.1 (10 Topics)

- Graphing an absolute value equation of the form $y=A|x|$ -
- Graphing an absolute value equation in the plane: Basic
- Graphing an absolute value equation in the plane: Advanced
- Graphing a parabola of the form $y=(x-h)^{2}+k$
- Graphing a square root function: Problem type 1
- Graphing a square root function: Problem type 2
- Graphing a square root function: Problem type 3
- Graphing a cube root function
- Translating the graph of an absolute value function: Two steps
- Translating the graph of a function: Two steps

## Chapter 3 Supplementary Topics (2 Topics)

- How the leading coefficient affects the shape of a parabola
- Classifying the graph of a function ภี

Week11: Sect. 3.1, 3.2, 3 (19 Topics, due on 04/12/2021 11:59 PM)

Section 3.1 (11 Topics)

- Matching parent graphs with their equations
- Translating the graph of a parabola: One step
- Translating the graph of a parabola: Two steps
- Translating the graph of an absolute value function: One step
- Translating the graph of a function: One step
- Transforming the graph of a function by reflecting over an axis
- Transforming the graph of a function by shrinking or stretching
- Transforming the graph of a function using more than one transformation
- Transforming the graph of a quadratic, cubic, square root, or absolute value function
- Finding the vertex, intercepts, and axis of symmetry from the graph of a parabola
- Domain and range from the graph of a quadratic function

## Section 3.2 (1 Topic)

- Transforming the graph of a rational function

## Section 3.4 (4 Topics)

- Evaluating a piecewise-defined function
- Graphing a piecewise-defined function: Problem type 1
- Graphing a piecewise-defined function: Problem type 2
- Graphing a piecewise-defined function: Problem type 3

## Chapter 3 Supplementary Topics (3 Topics)

- How the leading coefficient affects the shape of a parabola
- Writing an equation for a function after a vertical translation
- Writing an equation for a function after a vertical and horizontal translation

## Section 4.1 (1 Topic*)

- Finding the vertex, intercepts, and axis of symmetry from the graph of a parabola
(*) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

Week 12: Section 3.5-3.6 (13 Topics, due on 04/19/2021 11:59 PM)

Section 3.5 (12 Topics)

- Sum, difference, and product of two functions
- Quotient of two functions: Basic
- Quotient of two functions: Advanced
- Combining functions: Advanced
- Introduction to the composition of two functions
- Composition of two functions: Basic
- Composition of a function with itself
- Expressing a function as a composition of two functions
- Composition of two functions: Domain and range
- Composition of two functions: Advanced
- Composition of two rational functions
- Word problem involving composition of two functions

## Section 3.6 (1 Topic)

- Rewriting a multivariate function as a univariate function given a relationship between its variables (̛)

Week 13: Section 4.1 (9 Topics, due on 04/26/2021 11:59 PM)

Section 3.1 ( 1 Topic)

- Finding the vertex, intercepts, and axis of symmetry from the graph of a parabola

## Section 4.1 (9 Topics*)

- Finding the vertex, intercepts, and axis of symmetry from the graph of a parabola
- Graphing a parabola of the form $y=x^{2}+b x+c$
- Graphing a parabola of the form $y=a(x-h)^{2}+k$
- Graphing a parabola of the form $y=a x^{2}+b x+c$ : Integer coefficients
- Graphing a parabola of the form $y=a x^{2}+b x+c$ : Rational coefficients
- Finding the $x$-intercept(s) and the vertex of a parabola
- Rewriting a quadratic function to find its vertex and sketch its graph
- Finding the maximum or minimum of a quadratic function
- Writing the equation of a quadratic function given its graph
(*) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

Week 14: Sections 4.2-4.4 (19 Topics, due on 05/03/2021 11:59 PM)

Section 1.5 (1 Topic)

- Writing a quadratic equation given the roots and the leading coefficient

Section 4.2 (8 Topics)

- Finding a polynomial of a given degree with given zeros: Real zeros
- Polynomial long division: Problem type 1 T
- Polynomial long division: Problem type 2 -
- Polynomial long division: Problem type 3 त
- Synthetic division
- Using the remainder theorem to evaluate a polynomial
- The Factor Theorem
- Using a given zero to write a polynomial as a product of linear factors: Real zeros

## Section 4.3 (4 Topics)

- Finding zeros and their multiplicities given a polynomial function written in factored form
- Multiplying expressions involving complex conjugates
- Finding a polynomial of a given degree with given zeros: Complex zeros
- Using a given zero to write a polynomial as a product of linear factors: Complex zeros

## Section 4.4 (7 Topics*)

- Finding zeros of a polynomial function written in factored form
- Finding zeros and their multiplicities given a polynomial function written in factored form
- Finding $x$ - and $y$-intercepts given a polynomial function
- Determining the end behavior of the graph of a polynomial function
- Determining end behavior and intercepts to graph a polynomial function
- Matching graphs with polynomial functions
- Inferring properties of a polynomial function from its graph
(*) Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.

Week 15: Sections 4.5-4.6 (21 Topics, due on 05/14/2021 11:59 PM)

Section 2.4 (2 Topics)

- Domain of a rational function: Excluded values
- Domain of a rational function: Interval notation

Section 2.5 (1 Topic)

- Finding $x$ - and $y$-intercepts of the graph of a nonlinear equation

## Section 4.5 (11 Topics*)

- Domain of a rational function: Excluded values
- Domain of a rational function: Interval notation
- Finding the asymptotes of a rational function: Constant over linear
- Finding the asymptotes of a rational function: Linear over linear
- Finding horizontal and vertical asymptotes of a rational function: Quadratic numerator or denominator
- Finding the asymptotes of a rational function: Quadratic over linear
- Graphing a rational function: Constant over linear
- Graphing a rational function: Linear over linear
- Graphing a rational function: Quadratic over linear
- Matching graphs with rational functions: Two vertical asymptotes
- Graphing a rational function with more than one vertical asymptote

## Section 4.6 (9 Topics)

- Writing a quadratic function given its zeros
- Solving a quadratic inequality written in factored form
- Solving a quadratic inequality శ
- Solving a polynomial inequality: Problem type 1 तᄌ
- Solving a polynomial inequality: Problem type 2 万
- Solving a polynomial inequality: Problem type 3 శ
- Solving a polynomial inequality: Problem type 4 ช
- Solving a rational inequality: Problem type 1 ช
- Solving a rational inequality: Problem type 2 图
$\left.{ }^{( }{ }^{*}\right)$ Some topics in this section are also covered in a previous section of this Objective. Topics are only counted once towards the total number of topics for this Objective.
