

Calculus with Analytic Geometry II  
MTH 132-001  
Fall 2022  
Sugar Grove Campus, BDE 244  
MW 12:30pm-2:10pm

### Instructor Contact Information and Availability

Name and Title:	Dr. Steve Kifowit, Assistant Professor (Pronouns: He/Him/His)
Waubonsee Email:	skifowit@waubonsee.edu
Office Location:	Sugar Grove Campus, BDE 249
Office Hours:	MTWTh 11:30am-12:30pm Zoom: MW 9:30am-10am Other office hours are available by appointment.
Phone Number:	(630) 466-6698
Preferred Contact Method:	Email or in-person
Response Time:	During weekdays, please allow for up to 24 hours for email response.

### Course Description

This second course in calculus and analytic geometry is a continuation of MTH 131. Topics covered include formal integration techniques, numerical integration, area between two curves, volumes of revolution, average value of a function, work, center of mass, improper integrals, arc length, surfaces of revolution, polar coordinates, slopes in polar coordinates, areas in polar coordinates, parametric equations, calculus with parametric equations, sequences, series, the integral test, alternating series, comparison tests, absolute convergence, ratio and root tests, power series, calculus with power series, Taylor series, and Taylor's Theorem.

### Prerequisite(s)

C or better in MTH 131 (Calculus with Analytic Geometry I)

### Illinois Articulation Initiative (IAI) Codes

M1 900-2, MTH 902

## Course Materials

### Textbook

Strang & Herman (2016). *Calculus--Volume 2*. OpenStax, ISBN: 978-1-938168-06-2

(A print copy of the textbook is not required for the class, but you must have access to the ebook, which is freely available online at <https://openstax.org/details/books/calculus-volume-2>.)

### Class Materials and Resources

The TI-83/84 Graphing Calculator is required for the course.

## Important Class Notes

Recommended Corequisite: None

Course Delivery Mode: Face-to-face

Credit Hours: 4.0

## Course Objectives

Throughout this course, the student will learn to:

1. apply techniques of integration, including numerical methods, to integrate algebraic and transcendental functions;
2. recognize need for and apply integration by parts, trigonometric substitution, partial fractions, and other integration techniques;
3. use the definite integral to find areas, volumes, lengths of curves, work, surface area, computation of moments, center of mass, etc.;
4. convert between rectangular and polar coordinates;
5. differentiate using polar coordinates;
6. integrate using polar coordinates;
7. graph equations in parametric form;
8. differentiate and integrate parametric equations;
9. explain and represent a series as a sequence of partial sums;
10. use the integral and comparison tests for convergence on positive series;
11. test alternating series for both absolute and conditional convergence;
12. use Taylor series to represent functions; and
13. use series in applications.

## Student Learning Outcomes

### Course Learning Outcomes

Upon successful completion of this course, the student will be able to:

1. solve real-world problems such as work, center of mass, and arc length, using integral calculus;

- analyze series by using theorems or corollaries and apply these theorems to find polynomial approximations to differentiable functions.

### College Learning Outcomes

This course contributes to the following college learning outcomes:

- Critical Thinking**  
Examine information in order to propose or develop solutions or construct arguments.
- Communication**  
Use clear language to communicate meaning appropriate to various contexts and audiences.
- Quantitative Literacy**  
Make judgments or draw appropriate conclusions based on the quantitative analysis of data.
- Global Awareness**  
Describe the interconnectedness of issues, trends or systems using diverse perspectives.
- Information Literacy**  
Use technology to ethically research, evaluate or create information.

### Methods of Evaluation of Student Learning, Grading Criteria, and Scale

Your performance in this course will be evaluated based on the following components:

#### Grading Criteria

Total points: 500

Grading Components	Score	Quantity	Subtotal	Percent
Tests	100	3	300 points	60%
Quizzes	10	10	100 points	20%
Comprehensive Final Exam	100	1	100 points	20%

#### Grading Scale

A  $\geq$  89.50%      B  $\geq$  79.50%      C  $\geq$  69.50%      D  $\geq$  59.50%      F < 59.50%

You can estimate your current grade at any time during the semester by computing the following percentage:  $100\% * (\text{Total points accumulated}) / (\text{Total points possible})$ . Please feel free to discuss your grade at any time during the semester. Throughout the semester, current grades will be available in our Canvas course shell.

## Attendance, late work, and make-up policy

Regular class attendance is an essential component of successful learning. Students are responsible for prompt attendance and participation in all class meetings. If you miss class, you will not be allowed to make up any tests, quizzes, or assignments that you may have missed (**but you may reschedule a test or quiz, or submit an assignment, in advance of a missed class period**). All material covered in class is the student's responsibility.

## Description and Details of Assignments

### Homework

Suggested homework problems from the online textbook will be assigned daily and posted to the class website. Most of these will not be collected for grading, but they should be considered mandatory. It is very important that you keep up to date with the homework exercises. Homework will prepare you for the tests and weekly quizzes.

### Quizzes

Be prepared for a 10-point, in-class quiz on each Wednesday, unless a test is scheduled (see the course schedule). No make-up quizzes will be given (unless scheduled prior to the quiz). Quizzes may have take-home portions. At the end of the semester, only your top ten (10) quizzes will count toward your overall grade. Quiz problems will be similar to class examples and textbook problems.

### Tests

Test problems will be similar to class examples, textbook problems, and quiz problems. In addition to computational problems, tests may include multiple choice, true/false, short answer, and/or writing problems. You must show all work (showing how you got your answer) on all tests to receive full credit. **You must work individually on all tests.** No make-up tests will be given (unless scheduled prior to the test). At the end of the semester, your lowest test score will be replaced by your final exam score (if this helps you).

### Final Exam

The final exam is comprehensive and will be worth 100 points toward your final grade. The final exam is scheduled for our last class period, December 14.

## Calculators

The TI-83/84 graphing calculator is required for this course. There are graphing calculator emulators available for smart phones and tablets--you may use these during class periods, but not during tests. If you would like to use a graphing calculator other than the TI-83/84, please discuss your options with your instructor. When we require more computational power than our hand-held calculators offer, we will use SageMath (<https://www.sagemath.org/>).

## Phones/Tablets/Laptops

Electronic devices may be used for taking notes and computing during lectures, but they may not be used on in-class tests. These devices must be silenced and put away during tests. Students in special circumstances who require their phones to be readily available must discuss their situations with the instructor.

## Institutional Policy

### Withdrawal

Waubonsee Community College reserves the right to administratively withdraw students who are not actively attending. Students may withdraw themselves from this course until the date noted on the Tuition Refunds page.

\*\*\* Please see the [Student Handbook](#) for other course policies and procedures.

## Institutional Statements

### Academic Integrity

Waubonsee Community College believes that all members of the community (students, faculty, staff, and administrators) have a responsibility to participate in learning with honesty, respect, and integrity. We must commit to engage in learning both in and out of the classroom, value each member in our learning community, demonstrate original thought, and help foster ethical, open, safe learning environments for all. For more information, please see the Waubonsee Community College Plagiarism Statement section in the [Student Handbook](#).

### Accessibility and Disability Statement

Accessibility is a value of our institution. We are committed to creating environments that are welcoming and that support all students' learning. If you experience barriers to your learning in this course please notify the instructor as soon as possible to discuss options. Students who experience barriers due to disability may contact the Access Center for Disability Resources to begin this conversation or establish accommodations.

### Plagiarism

Waubonsee firmly upholds sound principles of academic integrity and responsibility. Plagiarism and cheating are serious infractions of academic integrity, and, as such, are considered breaches of the Code of Student Conduct. If a student has violated this policy, I will report the infraction to the Dean for Student Success and Retention and the student may fail the assignment or the course, depending on the severity or the number of infractions.

## Student Support Services and Resources

Waubonsee Community College is committed to your success, and has many free supports, services, and resources available to you. Please visit the [Waubonsee Cares](#) page for links to basic needs (food, shelter, safety, etc.) support and resources both on campus and in the community. Please see the [Student Experience](#) page for more information and to get connected with Academic Support, Career Development, Counseling and Advising, Disability Resources, Student Life, Student Services, Technical Assistance Center, the Veterans Program, and many more! If you're not sure what type of assistance you need, please talk to me and I will help get you connected.

## Course Schedule

Week (Date)	Sections	Topics & Assignments
<b>Week 1</b> Aug 22 & Aug 24	Course Information, Section 2.1	Area between curves (Quiz on 8/24)
<b>Week 2</b> Aug 29 & Aug 31	Sections 2.2 & 2.3	Volumes by cross sections, Cylindrical shells (Quiz on 8/31)
<b>Week 3</b> Sep 7	Sections 2.4 & 2.5	Arc length, Applications (Quiz on 9/7)
<b>Week 4</b> Sep 12 & Sep 14	Sections 2.6 & 2.9	Centers of mass, Hyperbolic functions (Quiz on 9/14)
<b>Week 5</b> Sep 19 & Sep 21	Section 3.1, <b>Test 1 on Wednesday, Sep 21</b>	Integration by parts, Test 1 covers sections 2.1-2.6 & 2.9
<b>Week 6</b> Sep 26 & Sep 28	Sections 3.1 & 3.2	Integration by parts, Trig integrals (Quiz on 9/28)
<b>Week 7</b> Oct 3 & Oct 5	Sections 3.3 & 3.4	Trig substitution, Partial fractions (Quiz on 10/5)
<b>Week 8</b> Oct 10 & Oct 12	Sections 3.6 & 3.7	Numerical integration, Improper integrals (Quiz on 10/12)
<b>Week 9</b> Oct 17 & Oct 19	Section 5.1, <b>Test 2 on Wednesday, Oct 19</b>	Sequences, Test 2 covers sections 3.1-3.4 & 3.6-3.7
<b>Week 10</b> Oct 24 & Oct 26	Sections 5.2, 5.3, & 5.4	Series, Integral test, Comparison tests (Quiz on 10/26)
<b>Week 11</b> Oct 31 & Nov 2	Sections 5.4, 5.5, & 5.6	Alternating series, Ratio and root tests (Quiz on 11/2)
<b>Week 12</b> Nov 7 & Nov 9	Sections 6.1, 6.2, & 6.3	Power series, Taylor's theorem (Quiz on 11/9)
<b>Week 13</b> Nov 14 & Nov 16	Section 6.4, <b>Test 3 is on Wednesday, Nov 16</b>	Taylor series, Test 3 covers sections 5.1-6.3
<b>Break</b> Nov 21 & Nov 23	<b>Thanksgiving Break</b>	No classes

Week (Date)	Sections	Topics & Assignments
<b>Week 14</b> Nov 28 & Nov 30	Sections 7.1 & 7.2	Parametric equations (Quiz on 11/30)
<b>Week 15</b> Dec 5 & Dec 7	Sections 7.3 & 7.4	Polar coordinates (Quiz on 12/7)
<b>Week 16</b> Dec 12 & Dec 14	Review, <b>Final Exam on Wednesday, Dec 14</b>	Final exam is comprehensive with emphasis on course learning outcomes.

November 11 is the last day for students to withdraw themselves. Please check the current Waubonsee [Academic Calendar](#) for important dates.

## Class Website

Course information, including tests, quizzes, answer keys and homework problems, can be found on the class website at <http://stevekifowit.com/classes/m132.htm>.

Grades, announcements, and Zoom meeting information will be posted in our Canvas course shell. Other course information will be available on the class website.

## Change of Delivery Mode

In the event that we must discontinue our face-to-face class meetings, we will automatically transition to synchronous Zoom meetings at our scheduled days and times.
