

WAUBONSEE

COMMUNITY COLLEGE

Calculus with Analytic Geometry III

MTH 233.001, CRN 10063

Fall 2026, TTh 9:30am-11:10am

Course Modality: Face-to-face

Class Start: 08/18/2026

Class Location: SG Campus, BDE 244

Credit Hours: 4 (Lecture: 4, Lab: 0)

Instructor Contact Information and Availability

Name and Title:	Dr. Steve Kifowit, Assistant Professor (Pronouns: He/Him/His)
Waubonsee Email:	skifowit@waubonsee.edu
Office Location:	Sugar Grove Campus, BDE 249
Office Hours:	MW 11:30am-12:30pm TTh 11:30am-1:00pm Other office (or Zoom) hours are available by appointment.
Phone Number:	(630) 466-6698
Preferred Contact Method:	Email or in-person
Response Time:	During weekdays, please allow for up to 24 hours for email response.

Course Description

This third course in calculus and analytic geometry is a continuation of MTH132. Topics include vectors, vector-valued functions, space curves, multivariate functions, partial derivatives, differentials, directional derivatives, gradients, double and triple integrals, vector fields, line integrals, and the theorems of vector calculus.

Prerequisite(s)

C or better in MTH 132.

Illinois Articulation Initiative (IAI) Codes

M1 900-3, MTH 903

Disclaimer: This course syllabus and schedule are subject to change. Updates and other revisions to course policies will be communicated via college (waubonsee.edu) email.

Course Materials

Textbook

Strang & Herman (2016). *Calculus--Volume 3*. OpenStax, ISBN: 978-1-938168-07-9

(A print copy of the textbook is not required for the class, but you must have access to the ebook, which is freely available online at <https://openstax.org/details/books/calculus-volume-3>.)

Class Materials and Resources

The TI-83/84 Graphing Calculator is required for the course.

Course Objectives

Throughout this course, the student will learn to:

1. Perform basic operations on vectors;
2. Calculate the dot product and cross product of two vectors;
3. Write equations of lines and planes in space, including equations of tangent planes and normal lines;
4. Differentiate and integrate vector functions in two or three dimensions;
5. Apply calculus, using vectors, to study motion in space and other situations;
6. Explain the concepts of limits and continuity for functions of several variables;
7. Find partial derivatives of functions of several variables;
8. Find differentials, directional derivatives, and gradients of functions of several variables;
9. Find extrema of functions of two variables, including using Lagrange multipliers;
10. Use cylindrical and spherical coordinates to write the equations of three-dimensional figures;
11. Simplify indefinite and evaluate definite double integrals;
12. Use double integrals in applications;
13. Simplify indefinite and evaluate definite triple integrals, including using cylindrical and spherical coordinates;
14. Use triple integrals in applications;
15. Demonstrate an understanding of vector fields;
16. Find/evaluate line integrals;
17. Use Green's Theorem;
18. Use Stokes' Theorem; and
19. Use the Divergence Theorem.

Student Learning Outcomes

Course Learning Outcomes

Upon successful completion of this course, the student will be able to:

1. apply partial derivatives to solve optimization problems;
2. compute double and triple integrals; and
3. apply the theorems of vector calculus to compute integrals.

College Learning Outcomes

This course contributes to the following college learning outcomes:

☒ Critical Thinking

Examine information in order to propose or develop solutions or construct arguments.

☐ Communication

Use clear language to communicate meaning appropriate to various contexts and audiences.

☐ Quantitative Literacy

Make judgments or draw appropriate conclusions based on the quantitative analysis of data.

☐ Global Awareness

Describe the interconnectedness of issues, trends or systems using diverse perspectives.

☐ Information Literacy

Use technology to ethically research, evaluate or create information.

Methods of Evaluation of Student Learning, Grading Criteria, and Scale

Your performance in this course will be evaluated based on the following components:

Grading Criteria

Total points: 500

Grading Components	Score	Quantity	Subtotal	Percent
Tests	100	3	300 points	60%
Quizzes	10	10	100 points	20%
Comprehensive Final Exam	100	1	100 points	20%

Grading Scale

A $\geq$ 89.50%

B $\geq$ 79.50%

C $\geq$ 69.50%

D $\geq$ 59.50%

F < 59.50%

You can estimate your current grade at any time during the semester by computing the following percentage: $100\% * (\text{Total points accumulated}) / (\text{Total points possible})$. Please feel free to discuss your grade at any time during the semester. Throughout the semester, current grades will be available in our Canvas course shell.

Attendance, late work, and make-up policy

Regular class attendance is an essential component of successful learning. Students are responsible for prompt attendance and participation in all class meetings. If you miss class, you will not be allowed to make up any tests, quizzes, or assignments that you may have missed (**but**

you may reschedule a test or quiz in advance of a missed class period). All material covered in class is the student's responsibility.

Description and Details of Assignments

Practice Problems and Reading Assignments

Practice problems from the online textbook will be suggested daily and posted to the class website. Practice problems will not be collected for grading, but they should be considered mandatory. It is important that you keep up to date with the problems. These problems will prepare you for the tests and weekly assignments. Also on a daily basis, you will be asked to read and work through certain sections of the textbook or lecture notes.

Quizzes

Be prepared for a 10-point, in-class quiz on each Thursday, unless a test is scheduled (see the course schedule). No make-up quizzes will be given (unless scheduled prior to the quiz). Quizzes may have take-home portions. At the end of the semester, only your top ten (10) quizzes will count toward your overall grade. Quiz problems will be similar to class examples and textbook problems. In addition to computational problems, quizzes may include multiple choice, true/false, short answer, and/or writing problems. There may be quiz problems for which calculators will not be allowed.

Tests

Test problems will be similar to class examples, textbook problems, and quiz problems. In addition to computational problems, tests may include multiple choice, true/false, short answer, and/or writing problems. There may be test problems for which calculators will not be allowed.

You must show all work (showing how you got your answer) on all tests to receive full credit. You must work individually on all tests. No make-up tests will be given (unless scheduled prior to the test). At the end of the semester, your lowest test score will be replaced by your final exam score (if this helps you).

Final Exam

Our final exam is comprehensive and will be worth 100 points toward your final grade. The final exam is scheduled for our last class period, December 10. **The final exam is NOT optional--it counts toward your final grade regardless of the outcome. The final exam cannot be rescheduled to a later date.**

Calculators

The TI-83/84 graphing calculator is required for this course. There are graphing calculator emulators available for smart phones and tablets--you may use these during class periods, but not during tests. If you would like to use a graphing calculator other than the TI-83/84, please discuss your options with your instructor. When we require more computational power than our hand-held calculators offer, we will use SageMath (<https://www.sagemath.org/>). **There will be some problems on tests and quizzes for which calculators are not allowed.**

Phones/Tablets/Laptops

Electronic devices may be used for taking notes and computing during lectures, but they may not be used on in-class tests. These devices must be silenced and put away during tests. Students in special circumstances who require their phones to be readily available must discuss their situations with the instructor.

AI Statement

All work submitted for this course must be completed by you. Use of artificial intelligence (AI) to generate content is strictly prohibited. Submission of text or other content generated by AI may be considered a violation of academic integrity, including AI-generated text that you have summarized or edited.

Institutional Policy

Withdrawal

Waubonsee Community College reserves the right to administratively withdraw students who are not actively attending. Students may withdraw themselves from this course until the date noted on the Tuition Refunds page.

*** Please see the [Student Handbook](#) for other course policies and procedures.

Institutional Statements

Academic Integrity

Waubonsee Community College believes that all members of the community (students, faculty, staff, and administrators) have a responsibility to participate in learning with honesty, respect, and integrity. We must commit to engage in learning both in and out of the classroom, value each member in our learning community, demonstrate original thought, and help foster ethical, open, safe learning environments for all. For more information, please see the Waubonsee Community College Plagiarism Statement section in the [Student Handbook](#).

Accessibility and Disability Statement

Accessibility is a value of our institution. We are committed to creating environments that are welcoming and that support all students' learning. If you experience barriers to your learning in this course please notify the instructor as soon as possible to discuss options. Students who experience barriers due to disability may contact the Access Center for Disability Resources to begin this conversation or establish accommodations.

Plagiarism

Waubonsee firmly upholds sound principles of academic integrity and responsibility. Plagiarism and cheating are serious infractions of academic integrity, and, as such, are considered breaches

of the Code of Student Conduct. If a student has violated this policy, I will report the infraction to the Dean for Student Success and Retention and the student may fail the assignment or the course, depending on the severity or the number of infractions.

Student Support Services and Resources

Waubonsee Community College is committed to your success, and has many free supports, services, and resources available to you. Please visit the [Waubonsee Cares](#) page for links to basic needs (food, shelter, safety, etc.) support and resources both on campus and in the community. Please see the [Student Experience](#) page for more information and to get connected with Academic Support, Career Development, Counseling and Advising, Disability Resources, Student Life, Student Services, Technical Assistance Center, the Veterans Program, and many more! If you're not sure what type of assistance you need, please talk to me and I will help get you connected.

Course Schedule

Week (Date)	Textbook Sections	Topics & Assignments
Week 1 Aug 18 & Aug 20	Course Information, Sections 2.1, 2.2, & 2.3	Vectors in 2- and 3-space, Dot product (Quiz on 8/20)
Week 2 Aug 25 & Aug 27	Sections 2.4, 2.5, & 2.6	Cross product, Lines and planes in space, Quadric surfaces (Quiz on 8/27)
Week 3 Sep 1 & Sep 3	Sections 2.7, 3.1, & 3.2	Cylindrical and spherical coords, Vector-valued functions (Quiz on 9/3)
Week 4 Sep 8 & Sep 10	Section 3.3, Test 1 on Thursday, Sep 10	Arc length, Test 1 covers sections 2.1-3.2.
Week 5 Sep 15 & Sep 17	Sections 3.3 & 3.4	Curvature, Motion in space (Quiz on 9/17)
Week 6 Sep 22 & Sep 24	Sections 4.1, 4.2, & 4.3	Functions of several variables, Limits, Partial derivatives (Quiz on 9/24)
Week 7 Sep 29 & Oct 1	Sections 4.4, 4.5, & 4.6	Tangent planes, Differentials, Directional derivatives, Gradients, Chain rule (Quiz on 10/1)
Week 8 Oct 6 & Oct 8	Section 4.7, Test 2 on Thursday, Oct 8	Optimization w/ 2nd partials test, Test 2 covers sections 3.3-4.6.
Week 9 Oct 13 & Oct 15	Sections 4.7 & 4.8	Optimization w/ Lagrange multipliers (Quiz on 10/15)
Week 10 Oct 20 & Oct 22	Sections 5.1, 5.2, & 5.3	Double integrals (Quiz on 10/22)
Week 11 Oct 27 & Oct 29	Sections 5.4, 5.5, & 5.6	Triple integrals (Quiz on 10/29)
Week 12	Section 5.7, Test 3 on	Change of variables, Test 3 covers sections

Week (Date)	Textbook Sections	Topics & Assignments
Nov 3 & Nov 5	Thursday, Nov 5	4.7-5.6.
Week 13 Nov 10 & Nov 12	Sections 6.1, 6.2, & 6.3	Vector fields, Line integrals (Quiz on 11/12)
Week 14 Nov 17 & Nov 19	Sections 6.4 & 6.5	Green's theorem, Divergence and curl (Quiz on 11/19)
Break Nov 24 & Nov 26	Thanksgiving Break	No classes
Week 15 Dec 1 & Dec 3	Sections 6.6, 6.7, & 6.8	Stokes' theorem, Divergence theorem (Quiz on 12/3)
Week 16 Dec 8 & Dec 10	Review, Final Exam on Thursday, Dec 10	Final exam is comprehensive with emphasis on course learning outcomes.

November 6 is the last day for students to withdraw themselves. Please check the current Waubonsee [Academic Calendar](#) for important dates.

Class Website

Course information, including tests, quizzes, and answer keys, can be found on the class website at <http://stevekifowit.com/classes/m233.htm>.

Grades, announcements, and Zoom meeting information (if necessary) will be posted in our Canvas course shell. Other course information will be available on the class website.

Change of Delivery Mode

In the event that we must discontinue our face-to-face class meetings, we may automatically transition to synchronous Zoom meetings at our scheduled days and times. In such a case, Zoom meeting information will be in our Canvas Course shell. Office hours will probably transition to Zoom as well. Check for announcements in our Canvas course shell.
